Israel, Illegitimate Gangster State—the Country That Supports Her Becomes Enemy of the World

## ZIONIST DREAM CURSE OF WORLD

### THE FAILURE OF THE CONTROL MECHANISM

By FRED FARREL   
 (From Danang, Vietnam)

Columnists in the daily newspapers of the U.S.A. have at last begun to discuss the Middle East crisis seriously. COMMON SENSE pretty well disposed of these matters back in the summer of 1967, in the wake of the "June war," we pointed out that U.S. policy in the Middle East had suffered a bottomless disaster; we pointed out that U.S. business interests would lose billions of dollars in the Middle East; we pointed out that Israel was a pipsqueak military power, and that the long-range military position of Israel was hopeless. At that time the American media were full of stories glorifying the "invincible" Israeli armed forces. Photographs of Israeli Defense Minister Moshe Dayan with his glamorous black eye patch

"Zionist politicians and their fellow travelers do not speak for the Jewish people: Indeed, the Zionist conspiracy against Jewish tradition and law makes Zionism — and all its activities and entities — the archenemy of the Jewish people today." — Rabbi K. Kohn, Brooklyn, N.Y. Chapter Neturei Karta as advertised in the New York Times, January 29, 1970.

adorned the covers of our weekly news magazines. Now Reality has overtaken the fraudulent claptrap published in the media at that time. The newspaper columnists are beginning to argue earnestly about what "ought" to be done in the Middle East.

What really "ought" to be done?

First, we ought to face the fact that U.S. policy around the world is caught up in an unbridled and disastrous debacle. The defects of U.S. policy are fundamental. Our policies are defective because they have been made by corrupt and incompetent policy-makers who know nothing of the arts of Statecraft. Statecraft is a high-class art, an aristocratic art; the people who make our policies today are not high-class or aristocratic people. They might indeed be described as "trash." The vocal and politically powerful American Jewish Community has pre-empted policy-making. They have made the kind of disastrous policies one would expect such trashy people to make. These policies have failed, as all properly snobbish people expected them to do.

The Middle East disaster is irretrievable. There is nothing Americans in the Middle East can do except try to get out with whole hides if possible; they will not get out with much else. Nixon and Kissinger still dream of "Helping Israel." Nixon has supplied jet aircraft to Israel. The U.S. Supreme Court, which in recent years seems to have become a branch of the Anti-Defamation League, has ruled that American Jewish lads can serve in the Israeli Army without losing their U.S. citizenship. All of this special favoritism for Jews is in vain. Nixon has proven that he likes to lick the Jew-

Richard Nixon and Golda Meir, Israeli Prime Minister, at recent White House meeting. Nixon bows graciously as he fawns at feet of mammon.

ish boots; indeed, his taste for the flavor of Jewish boots is enormous. Nevertheless, he cannot help Israel. Any further military action on the part of Israel will only aggravate the Middle East situation. Any military intervention by the U.S.A. in the Middle East would be disastrous. We could not match military action with acceptable political action.

In short, we are not called upon to do anything in the Middle East. We should face the fact that the Middle East is a disaster which has already occurred. Before it is finished, the U.S. Sixth Fleet will be squeezed out of the Mediterranean. NATO will be thrown out of Europe. These things take a bit of time to unwind, but the basic disaster occurred during June, 1967. Soviet Intelligence deliberately sucked Israel into the 1967 war in order to set in motion a master plan to take over the Eastern Hemisphere. The Soviet plan has clicked to absolute perfection and is still rolling along in high gear. There is absolutely nothing which either the U.S.A. or Israel can do about it, except watch carefully to see how a really high-class geopolitical operation is conceived and executed.

Why is Soviet policy succeeding while U.S. policy fails?

Soviet policy today represents a sounder understanding of world geopolitics. American policy is merely Jewish policy, made by natural-born pants pressers and pawnbrokers rather than by bona-fide geopolitical experts. Public opinion is against the American position virtually around the world today. We cannot act anywhere without stirring a hornet's nest of hostility. Jewish policy is not popular in today's world. The American people have been kept in the dark about increasing hostility to American Jewish policy. When I was in Libya ten years ago, I talked to American enlisted men at Wheelus Airforce Base. They told me some pretty wild tales about the unpopularity of Americans in Libya. American women and small children, dependents of servicemen stationed at Wheelus Airforce Base, had been assaulted and in some cases badly injured by angry natives. The American

press covered this up and concealed it from the public. Around the world, hostility toward the alliance between the U.S.A. and World Jewry has been growing steadily for many years. This hostility is now immense and it absolutely inhibits American action in the Middle East. We have lost the Middle East, period. The columnists who are beginning to argue about what we "ought" to do in the Middle East are merely blowing hot air. The real argument is about what we ought to have done thirty years ago. It is too late to argue now. Dean Acheson, who was Secretary of State at the time when the Republic of Israel was formed, says in a recent book that he opposed the founding of the Republic of Israel on the grounds that it could cause only "lasting chaos" in the Middle East. Harry S. Truman, who was President at that time, says he also was against founding the Republic of Israel. Apparently mere Presidents and Secretaries of State do not have much to do with the making of American policy any more. The will

Washington, D.C. is the scene of an unprecedented lawsuit in which Saul E. Jofes, former Secretary-General of the International Council of B'nai B'rith, is suing a rabbi, also an officer of the B'nai Brith, for libel. Jofes objects to the "Zionizing" of American Jewish organizations and making them totally subservient to the alien world Zionist organization.

of the powerful American Jewish Community prevailed. The "lasting chaos" which Dean Acheson feared was installed in the Middle East. A large number of Jews were gathered from all parts of the earth and dumped upon the unpromising sandpile of Palestine. Israel today is already overpopulated. It cannot take care of the normal increase of population without expanding. If Jews are to live and multiply in the Middle East, then Arabs must die to make room for them. The Arabs are not in any way amiable to such a proposition.

Mr. Kosygin says in Moscow, with a perfectly straight face, "We are in favor of the continued existence of Israel, but we are against Israeli expansion." This translates to mean that Kosygin is in favor of destroying Israel, but not quite yet. The Jews cannot exist satisfactorily in the Middle East without expansion. The situation is an absolute cul-de-sac from which no good escape is available. The end result is bound to be disaster for somebody. The first disaster was the utter debacle of U.S. policy in the Middle East. We no longer have any viable position in the Middle East. The debacle of U.S. policy in the Middle East is now complete.

Intelligence circles in the Far East are abuzz with rumors of a deal between "Tricky Dickey" and the Red Chinese. Everybody who really knows anything in the Far East knows that Peking is full of American Jews who exercise great power over the policies of Red China. This goes back to the days when the U.S. State Department and the CFR successfully brought
